

# PMP1000 Booster Pump

## User's Instruction and Manual

Ver. 11/2020

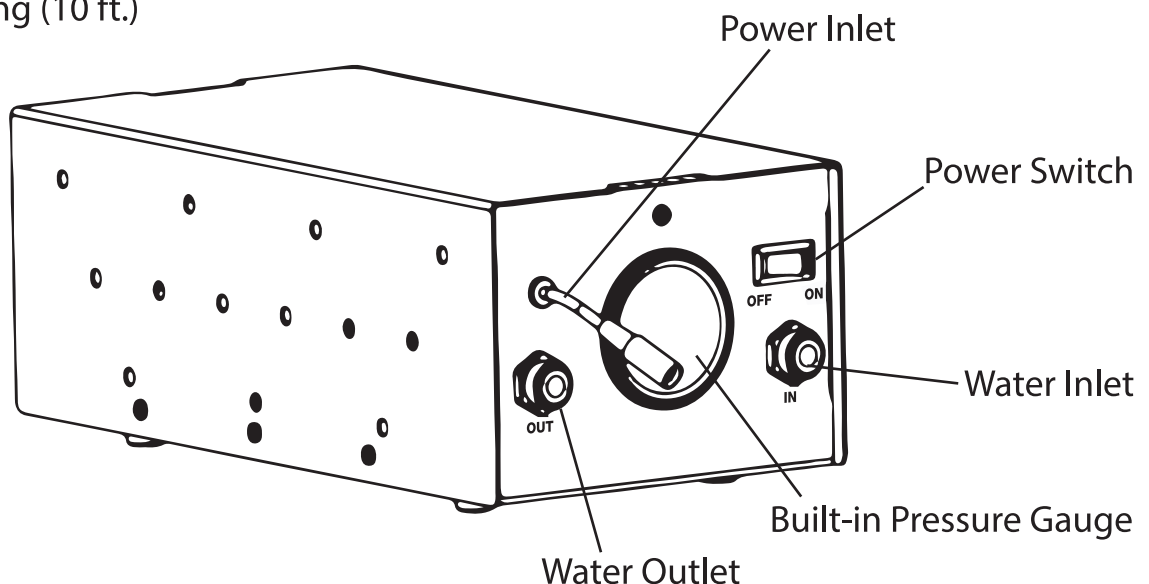

### Packing List and Components

#### Pre-cautions

1. This pump only works at temperature of 41°F – 100°F. When ambient temperature drops below 5°F, unplug the power adapter, and drain the water inside the pump completely. Freezing water inside the pump may cause permanent damage to the product.
2. This pump requires 30 psi minimum water pressure to start.
3. Stop using this pump if: there is visible damage to the water application system, or leak of any kind is detected at the application.
4. Periodically check possible leaks on the application.
5. Do not try to open or modify the pump to avoid physical or property damage; any damage caused by unauthorized modification will void the warranty.

#### Part list

- Booster pump with casing
- Power adapter
- User's manual
- 3/8" PE tubing (10 ft.)

## Installation and Operation

1. Make sure the place that the pump is being installed is damp and away from direct sun light.
2. All fittings on the pump are quick fittings, secure the installation by inserting at least 1/2" of the tubing into the fittings.
3. Shut off the water supply. Cut the enclosed 3/8" tubing into half, connect the water supply to one end of the 3/8" tubing, then insert the other side of the tubing into the Water Inlet fitting on the pump. Connect the other half of the tubing to the Water outlet fitting with the other end connects to the desired application. Downsizing/Upsizing might be required based on actual water supply size.
4. Turn on water supply and the power switch on the pump. Current water pressure will be visible on the built-in pressure gauge. Pump will kick start when water pressure is higher than 30 psi and stop automatically when water pressure is at 150 psi.

## Warranty Registration

To register your product for the warranty, visit our website at [123filter.com](http://123filter.com) and go to the "Warranty" tab.

We provide a 30-day money-back guarantee, a 1-year manufacturer warranty, and lifetime tech support for all of our products. However, we do not have the order information from websites other than 123Filter.com (Amazon, Home Depot, etc.), so please be sure to fill in that information upon registration of your system. If you have any questions or concerns about your product, please do not hesitate to call or email us, or put it in the notes/comments upon your warranty registration. Your satisfaction is our business!

If you are happy with our products and service, please show your support by writing a product review on Amazon, even just a single line. It takes you just a minute but means a lot to us. Thank you!
